

KING SALMAN HOSPITAL SCOPE OF SERVICE

2020

1. LOCATION

King Salman Hospital, a secondary hospital of the C1 Cluster, was established many decades ago. KSH is located in Aisha Bint Abi Bakr Street, Riyadh 12769. The hospital has 252 beds that serves population of nearly one million residents with largely midend socioeconomic demographics. KSH has the busiest integrated diabetes management center and Home care services.

KSH is accredited hospital with JCI & CBAHI. The board of KSH is committed to Provides care with high quality & patient safety and in fostering a safe environment for patients and their families. In the interest of maintaining its high quality of care and its practice of continuous improvement, the Board wants unsafe conditions and practices eliminated.

2. VISION

“To become a leading integrated healthcare system in Saudi Arabia by 2025”

3. MISSION

“To partner with people to help them live healthier, longer & happier life”

4. VALUES

- **Integrity** “Follow the best ethics, morals & values in everything we do”
- **Passion** “Passion drives our work”
- **Respect** “Deal with everyone, no matter who, with utmost respect”
- **Teamwork** “Build teams & always prefer teamwork over individual work”
- **Accountability** “Take ownership & action to improve with a measurable difference”
- **Excellence** “Do things right per the highest standards of safety, quality & efficiency”
- **Community & People Centeredness** “Strive for improving overall health of C1 community”

5. STRATEGIC GOALS

- Improve access to healthcare driven by enhanced efficiency and effectiveness
- Measure and report quality performance
- Operate the hospital new tower
- Enhancing human resources functions
- Improve patient experience
- Focus on clinical integration
- Enhance our commitment to patient safety
